CONTENTS OF VOLUME XV.

NUMBER XLIII.

Page.

ART. I. Notice of Meteoric Iron near Lion River, Great Namaqualand, South Africa: and of the detection of Potassium in Meteoric Iron: by CHARLES UPHAM SHEPARD, M.D., - 1

II. Notice of Professor Clark's Thesis on Metallic Meteorites, - 7

III. Remarks on the Distortion of the Achenium in certain species of Carex; by JOHN CAREY, - - - - - - - - 22

IV. On the Reproduction and supposed Existence of Sexual Organs in the Higher Cryptogamous Plants; by ARTHUR HENFREY, F.L.S., - - - - - - - - - 25

V. Review of Phillips's Mineralogy by Brooke and Miller, - 41

VI. Description of the interior of the Cranium and of the form of the Brain of Mastodon giganteus; by JEFFRIES WYMAN, M.D., 48

VII. On the Auroral Bow of June 11th, 1852; by Rev. CHESTER S. LYMAN, - - - - - - - - - 55

VIII. Notes on Kilauea and the recent Eruption of Mauna Loa; by Rev. TITUS COAN, - - - - - - - - 63

IX. Temperature of the air and surface water of the Sea, taken on a voyage from Samoa to Valparaiso, in 1841; by W. C. CUNNINGHAM, - - - - - - - - - 66

X. Notice of a Binocular Microscope; by J. L. RIDDELL, - 68

XI. On a new Method of Illuminating Opake Objects, for the higher powers of the Microscope:—and on a new Achromatic Condenser; by J. L. RIDDELL, - - - - - - 69

XII. On the Paramecium aurelia; by OGDEN ROOD, A.B., - 70

XIII. On the causes which may have produced Changes in the Earth's Superficial Temperature; by W. HOPKINS, Esq., etc., With a Map of Winter Isothermal lines, - - - - - 72

XIV. The Relations of Cells to the Physical and Teleological views of Organization; by W. I. BURNETT, M.D., - - 87

XV. A Method of getting rid of Sal-ammoniac in Analysis; by Dr. J. LAWRENCE SMITH, - - - - - - - - 94

XVI. Description of a Brown Coal Deposit in Brandon, Vermont, with an attempt to determine the Geological Age of the principal Hematite Ore Beds in the United States; by EDWARD HITCHCOCK, D.D., LL.D., - - - - - - - - 95

Page.

XVII. On a New Kind of Electro-magnet; by M. Jerome Nicklès, - - - - - - - - - - 104

XVIII. On the Permeability of Metals to Mercury; by M. J. Nicklès, - - - - - - - - - - 107

SCIENTIFIC INTELLIGENCE.

Correspondence.—Correspondence of M. J. Nicklès, on Researches presented to the Academy of Sciences at Paris, in August; On Molecular Physics, 109.—On the relation of Specific Heat to Atoms, 110.—On Double Refraction artificially produced in Crystals of the tesseral or regular system: On Lightning, 111.—On Butyric Alcohol, 112.—On a new Process for determining Dilatations, by M. J. F. Silbermann, 113.—On Ruhmkorff's Apparatus for transforming Dynamical into Statical Electricity, 114.—De la Rive's Interruptor as improved by Miraud, 115.—Correspondence of T. S. Hunt on Atomic Volume, 116.

Chemistry and Physics.—Stibmethylium and its Compounds, 117.—Note on the Kakodyl of Valerianic Acid: Constitution of Spermaceti, 118.—Positive Photographic Pictures: Determination of arsenic in cases of poisoning, 119.—Cocinon, Myriston and Laurostearon: On the Allotropic Modification of Oxyd of Cobalt, by F. A. Genth: Observations on the Zodiacal Light made at the Kew Observatory from January to April, 1850, by Mr. H. R. Birt, 120.—On the Form of Images produced by Lenses and Mirrors of different sizes, by Sir David Brewster, 121.—On a Rock-Crystal Lens and Decomposed Glass found in Nineveh, by Sir David Brewster, 122.—On Magnetism and Diamagnetism, by Prof. Matteucci, 123.—On a Manifold Binocular Camera, by A. Claudet: On Poisson's Theoretic Anticipation of Magno-crystallic Action, by Dr. Tyndall, 124.—Examination of Dove's Theory of Lustre, by Sir David Brewster: Notice of a Tree struck by Lightning, by Sir David Brewster, 125.

Geology.—On the Connection between Geological Theories and the Figure of the Earth, by Mr. H. Hennessey: Geology and Palæontology of a part of the Rocky Mountain Region, by Prof. J. Hall, 126.—Geological Survey of Canada, 129.

Botany and Zoology.—Carices America Septentrionalis exsiccatæ; edidit H. P. Sartwell, M.D., 129.—J. G. Agardh, Species Genera, et Ordines Algarum, 131.—L. R. Tulasne, Monographia Podostemacearum, 132.—Seeman, Botany of the Voyage of H. M. S. Herald, &c.: Walpers, Annales Botanices Systematicæ: Stansbury's Expedition to the Great Salt Lake, 133.—A New Genus and Species of Crustacea, 135.

Astronomy.—New Planet: Return of the Twin-Comet of Biela, 135.—Shooting Stars of August 9-10, 1852, 136.

Miscellaneous Intelligence.—Meeting of German Naturalists at Wiesbaden, 136.—Stereoscope, 140.—Pseudoscope of Wheatstone, 142.—Riddell's Binocular Microscope, 143.—On the Koh-i-noor Diamond, by Prof. Tennant: On Glynn and Appel's Patent Paper for the prevention of Piracy and Forgery by the Anastatic Process, by S. Bateson, 144.—Notice of the "Ice Spring" in the Rocky Mountains: Mollusca of the West Indies: Earthquake in New England: Fossil Elephant, 146: Gold in Vermont, by Prof. O. P. Hubbard, 174.—*Obituary.*—Gideon Algernon Mantell, LL.D., F.R.S., F.G.S., &c., 147.—Dr. Daniel Drake: Dr. Pfaff, 150.

Bibliography.—First Principles of Chemistry, by B. Silliman, Jr., 150.—A Memoir on the Equinoctial Storms of March-April, 1850, by F. P. B. Martin, Esq., 152.—Curiosities of the Microscope, by Rev. Jos. Wythes: Analytical Physics, or Trinology, by Robert Forfar: Lectures on the Electro-magnetic Telegraph, with an historical account of its rise and Progress, by Laurence Turnbull, M.D: Annals of Science, being a record of Inventions and Improvements in applied Science, by J. Hamilton Smith, A.M., 153.—Annals of the Astronomical Observatory of Georgetown College, D. C.: The Polytechnic Journal: The Canadian Journal: Palæontographical Society,

154.—Quarterly Journal of Microscopic Science: ALEXIS PERREY, Mémoire sur les Tremblements de Terre ressentis dans la Peninsule Turco-hellenique et en Syre—Documents relatifs aux Tremblements de Terre dans la nord de l'Europe et de l'Asie—Mémoires sur les Tremblements de Terre aux Etats-Unis et dans le Canada, 155.—Norton's Literary Register, 1853, 156.

List of Works, 156.

NUMBER XLIV.

Page.

ART. XIX. On Changes of Level in the Pacific Ocean; by JAMES D. DANA, - - - - - - - - - - 157

XX. On Soleil's Saccharimeter; by W. P. RIDDELL, A.B., - 175

XXI. Observations on some Mounds on the Tensaw River; by A. BIGELOW, - - - - - - - - - - - 186

XXII. On the Phosphorescence of some Marine Invertebrata; by M. A. DE QUATREFAGES, - - - - - - - - 193

XXIII. On the question whether Temperature determines the Distribution of Marine Species of Animals in Depth; by JAMES D. DANA, - - - - - - - - - - 204

XXIV. Reëxamination of American Minerals: Part I.—Emerylite; Euphyllite; Litchfield Mica; Unionite; Kerolite; Bowenite; Williamsite; Lancasterite; Hydro-magnesite; Magnesite: by Professor J. LAWRENCE SMITH, M.D., and GEORGE J. BRUSH, Ph. B., - - - - - - - - 207

XXV. A Consideration of some of the Phenomena and Laws of Sound, and their application in the Construction of Buildings designed especially for Musical Effect; by J. B. UPHAM, M.D., 215

XXVI. Considerations on the Theory of Chemical Changes, and on Equivalent Volumes; by T. S. HUNT, - - - - 226

XXVII. New and ready method of determining the Alkalies in Minerals: Part I.—The Quantitative Determination of the Alkalies in the silicious minerals not soluble in Acids: with a note on a new method of forming the Protoxyd of Nitrogen; by Prof. J. LAWRENCE SMITH, M.D., - - - - 234

XXVIII. Abstract of a Meteorological Journal kept at Marietta, Ohio, for the Year 1852; S. P. HILDRETH, M. D., - - 243

XXIX. On a probably new element with Iridosmine and Platinum, from California; by Dr. F. A. GENTH, - - - - - 246

XXX. On the Causes which may have produced Changes in the Earth's Superficial Temperature; by W. HOPKINS, Esq., etc., 248

XXXI. Brief Characters of some New Genera and Species of Nyctaginaceæ, principally collected in Texas and New Mexico, by CHARLES WRIGHT, Esq., under the direction of Col. J. D. GRAHAM; by ASA GRAY, M.D., - - - - 259

SCIENTIFIC INTELLIGENCE.

Correspondence.—Correspondence of M. J. Nicklès: On Foucault's New Method of exhibiting by experiment the Rotation of the Earth, 263.—Influence on Astronomical Observatories of vibrations produced by vehicles passing on roads, and other causes, 265.—On the Tangent Compass: On the Self-registering Compass, 266.—On Extinguishing Fires by Steam: On Bread, 267.—Chemical Papers read before the Academy of Sciences: On Electrical Machines: On the Manufacture of Paper, 268.—On Coloring Silk through the Food of the Silkworms: On Sulphate of Quinidine, 269.—On the Electric Telegraph, 270.

Chemistry and Physics.—On the Epipolic Dispersion of Light, 270.—On Heliochromics, 272.—Fluorid of Antimony: Anhydrous Valerianic Acid, 273.—New Compound of Cobalt, 274.—Separation of Manganese from Iron and Nickel, by Dr. T. Schiel: Phosphoric Acid in some of its relations to Physiology and Pathology, by D. Breed, M.D.› 275.

Mineralogy and Geology.—On Petalite and Spodumene, by C. Rammelsberg, 277.—On Humite, by M. Rammelsberg: Fossil Bones, probably Reptilian, from the Coal formation of Nova Scotia, discovered by Mr. Dawson and Sir Charles Lyell, 279.

Botany and Zoology.—Mohl, Grundzüge der Anatomie und Physiologie der vegetabilischen Zelle: Hermann Schacht. Die Pflanzenzelle, der innere Bau, und das Leben der Gewächse, 279.—Lindley, Folia Orchidacea; an Enumeration of the known species of Orchids: Remarks on the Mode of Vegetation of European and North American Trees transported to Madeira, by Prof. Oswald Heer, 280.—On Fossil Pachydermata in Canada, by T. Cottle, 282.

Astronomy.—The Nineteenth Asteroid: The Twentieth Asteroid: New Planets—Twenty-first Asteroid: Twenty-second Asteroid, 283.—Twenty-third Asteroid, 284.

Miscellaneous Intelligence.—Ericsson's Caloric Engine, 284.—Toronto Observatory, 287.—The Total-Reflexion Stereoscope, by Sir David Brewster, 288.—Notice of a Chromatic Stereoscope, by Sir David Brewster, K. H., F.R.S., &c. 289.—Spots on the Sun: Meteor observed at Toulouse by M. Petit and at Bordeaux by M. Abria: On a new Meteoric stone from Gütersloh, 290.—*Obituary.*—Dr. Daniel Drake, 291.—Prof. C. B. Adams, 292.—Sears C. Walker, 293.—William MacGillivray, 295.

Bibliography.—Report on the Geology of the Lake Superior Land District, by J. W. Foster and J. D. Whitney, 295.—Report of a Geological Survey of Wisconsin, Iowa and Minnesota Territorry, and incidentally of a portion of Nebraska Territory, by David Dale Owen, 296.—A History of Infusorial Animalcules, living and fossil, illustrated by several hundred magnified representatives, by Andrew Pritchard, M.R.I., &c., 299.—On the Origin of the Forms and Present Condition of some of the Clusters of Stars and several of the Nebulæ, by Prof. Stephen Alexander, 300.—Chemical Field Lectures for Agriculturists, by Dr. Julius Adolphus Stöckhardt, edited with notes by James E Teschemacher: Principles of Human Physiology, with their chief applications to Psychology, Pathology, Therapeutics, Hygiene and Forensic Medicine, by Wm. B. Carpenter, M D, &c, 301.—Industrial Drawing, &c., for the use of Academies and Common Schools, by D. H. Mahan, LL.D.: American Polytechnic Journal, conducted by Professor C. G. Page, J. J. Greenough, M.E., and Chas. C. Fleischmann, C.E.: Sixth Annual Report of the Board of Regents of the Smithsonian Institution, 302.—On the Extinct Species of American Ox and American Lion, and a Memoir on the Extinct Dicotylinæ of America, by Joseph Leidy, M D.: Proceedings of the Academy of Natural Sciences of Philadelphia, 303.

List of Works, 303.

NUMBER XLV.

Page.

ART. XXXII. On the Electrotyping Operations of the U. S. Coast Survey; by GEORGE MATHIOT, Electrotypist: being a Report to Major I. I. STEVENS, Assistant in charge of the Coast Survey Office. With a Plate, - - - - - - 305

XXXIII. Brief Characters of some New Genera and Species of Nyctaginaceæ, principally collected in Texas and New Mexico, by CHARLES WRIGHT, Esq., under the direction of Col. J. D. GRAHAM; by ASA GRAY, M.D., - - - 319

XXXIV. On the Discovery of two species of Trichomanes in the State of Alabama, one of which is new; by ASA GRAY, M.D., 324

XXXV. On a method of exhibiting the Phenomena of Diffraction with the Compound Microscope; by OGDEN N. ROOD, A.B., 327

XXXVI. On Minerals accompanying Chromic Iron; by THOMAS H. GARRETT, - - - - - - - - - - 332

XXXVII. On the Causes which may have produced Changes in the Earth's Superficial Temperature; by W. HOPKINS, Esq., etc., 334

XXXVIII. Observations on a newly discovered Animalcule; by J. W. BAILEY, - - - - - - - - - - 341

XXXIX. A Consideration of some of the Phenomena and Laws of Sound, and their application in the Construction of Buildings designed especially for Musical Effect; by J. B. UPHAM, M.D., 348

XL. Notice of the Meteoric Iron found near Seneca River, Cayuga County, N. Y.; by CHARLES UPHAM SHEPARD, M.D., 363

XLI. Notice of the "Mastodon Giganteus" of Dr. J. C. Warren, 367

XLII. Notice of the Rarer Minerals and New Localities in Western North Carolina; by C. L. HUNTER, M.D., - - - 373

XLIII. Review of Mr. Blake's Article on the Flow of Elastic Fluids; by JOEL E. HENDRICKS, - - - - - - 378

XLIV. On a New System of Electro-Magnets; by M. J. NICKLÈS, 380

XLV. Abstract of Meteorological Observations made at Burlington, Vt., in 1852; by Z. THOMPSON, - - - - - 385

XLVI. Some Account of the Proteus anguinus; by JNO. C. DALTON, JR., M.D. With a Plate, - - - - - - 387

XLVII. On Ericsson's Hot Air, or Caloric Engine; by Prof. WILLIAM A. NORTON, - - - - - - - - - 393

SCIENTIFIC INTELLIGENCE.

Correspondence.—Correspondence of M. J. Nicklès: On the Verification of a Standard Meter, 413.—On comparing Standard Weights in a Vacuum, 417.—Caloric Engine, 418.—Engine, using the vapor of water at a high temperature, 419.—Engine of M. Beauregard, 420.—Engine of M. Andraud, called Electro-caloric, 422.—Fusion and volatilization of Platinum and Silica, 424.—Pisciculture: Prize, 425.

Chemistry and Physics.—Compass of Tangents, 425.—On the double refraction produced by compression in Crystals belonging to the regular system, 426.—On the Electrolytic Law: Products of the fermentation of Citrate of Lime, 427.—On the compounds of Glycerine with Acids: Alkaloids in Opium: On the constitution of Mutton Tallow, Human Fat and Spermaceti, 428.—On the manufacture of Glycerin, by CAMPBELL MORFIT, M.D., 429.

Mineralogy and Geology.—Mineralogical Notices, No. V, 430.—On the Crystallization of Chondrodite, by J. D. DANA, 448.—Notice of a crystal of Fischerite, by NICHOLAS KOKSCHAROV, 449.—On Argentiferous Galena from Arkansas, by Prof. W. W. MATHER: On the alleged great Coal Bed of Perry County, by Prof. W. W. MATHER: On the supposed bed of Coral at a high elevation, on the Island of Maui, by Dr. C. F. WINSLOW, 450.

Botany.—Principles of the Anatomy and Physiology of the Vegetable Cell, by HUGO VON MOHL, M.D., etc., 451.—Dr. Hooker's Flora of New Zealand: The Oak-Vegetation of America, by Prof. LIEBMAN: Martius, Flora Braziliensis, 456.

Astronomy.—New Comet: Thalia: Fortuna: Parallax of a Star, 457.

Miscellaneous Intelligence.—Meteorological Observations at Burlington, Vt., by Z. THOMPSON: Chart of Isothermal Lines, 459.—Belcher's Artesian Well in St. Louis, 460.—Washington Territory, 462.—*Obituary*—Anthony D. Stanley: Von Buch, 464.

Bibliography.—Cosmography or Philosophical Views of the Universe, by CHARLES F. WINSLOW, M.D.: Handbook of Universal Geography, edited by J. CAREY CALLICOT, A.M.,: Elements of Geology, by ALONZO GRAY, A.M., and C. B. ADAMS, A.M.: Catalogue of North American Reptiles in the Museum of the Smithsonian Institution, by S. F. BAIRD and C. GIRARD, 465.—Annual Report of the Superintendent of the Coast Survey: A Synopsis or Systematic Catalogue of the Medicinal Plants of the United States, by A. CLAPP, M.D.: Natural History of New York; Palæontology, by JAMES HALL: Journal of the Academy of Natural Sciences, Philadelphia: Crustacea of the U. S. Exploring Expedition under Capt. C. Wilkes, by J. D. DANA, 466.

List of Works, 466.

Index, 67.

PLATE I.—Map of Winter Isothermal Lines illustrating Prof. Hopkins on Climate.

PLATE II.—Electrotyping Apparatus: Article XXXII.

PLATE III.—Proteus anguinus: Article XLVI.

ERRATA.

P. 162, first line, for "130," read "189."
P. 278, line 9 from top, for "113°," read "130°."
P. 279, " 9 from top, for "Fe," read "Fl."
P. 325, line 11 from top, for "*northeastern*," read "*northwestern*."
P. 358, line 11 from bottom, for "And in another *place*," read "And in another *work*."
P. 358, line 18 from bottom, for "In one of his *desultory volumes*," read "*In his Music of Nature.*"
P. 433, line 4 from top, for "*Sunadin*," read "*Sanidin*."
In part of edition, P. 440, 4th line from bottom, for "*ibid*," read "J. f. pr. Ch., lvii, 276."
Vol. xiv, p. 62, line 20 from bottom, for "M : T," read "M or T."
